

CAPABILITIES STATEMENT

*"Disrupting and demystifying
cybercrime by proactively
educating people to eliminate the
fear they face when addressing
the tech they use every day."*

Founded in 2008, Direnzie Technology is a technology issues management consulting firm that specializes in cybersecurity resolutions & technology crisis management solutions designed to address issues faced by organizations today.

Our mission is to help business owners safeguard against cybersecurity incidents by identifying vulnerabilities in their system's architecture by conducting assessments and providing expertise at the board level.
